You've got one bad game, two kick back and relax 15 minute casual games that works well with really close friends that are here to stay for a while and are willing to chillax. The other two are one of the most fun I've had in video games. They are so fun. 1 is a sequel to an existing game in the packs before but the other is something that is truly unique and original. Trust me when I say this game a lone is wort the money for the whole pack.

9\/10. Don't mind the 10 minute playtime. I have played this game several times on gathering events via other means and finally saw it fall back to its lowest recorded price.

There are games that might intrigue you to try before you buy and this is one of them. As mentioned its really hard to get to know a game or "games" until you try them out.

I have family that do not really play computer games(older people) but we tend to always go out together on vacation. This is the best and most fun Computer game they played(along with drawful).

Most of the games in this particular pack are homeruns in family entertainment. Even if you don't speak English you can answer in your own language and still get the Hilarious results you want to have a GREAT time.

The games are played via Phones\\Tablets for best results. They are different games but they are mostly fun even for younger and older players.

If you are afraid to use the refund system or try it via "other" means. I am giving away 1 Quiplash giftlink from Humble to the first person who wants it, just comment.

Again Do support the Devs and buy the pack you want(or buy all of them) once you tried the games. Just make sure you have decent internet connection and have a blast

Pros-
VERY FUN!
Fun for all ages
Simple PC requirements
Easy to set up
The best Party pack from the 5 release only other mention would be getting Drawful 2
